Ref No. : CG-007

Rev : 1

Rev Date : 20/04/01

The management of Canglobal Group Of Companies consist of the following companies; Canglobal Canada, Canglobal (M) Sdn Bhd, CV Canglobal Indonesia here after CANGLOBAL.

Canglobal Provides equipment, systems and services, on and offshore and prevention of pollution is of primary importance to the company.

The company is committed to reducing the impact of its operations on the environment through continual improvement of its processes and activities. Activities are planned and performed to

- prevent environmental pollution and minimize loss, should and incident occur,
- comply with legislative and contractual environmental requirements,
- conserve resources and promote recycling

Canglobal will fulfil this policy through the setting and reviewing of environmental objectives and targets and through the implementation of our Environmental Management System (EMS). Through our EMS we monitor, measure, and take appropriate actions to reduce any detrimental effect our operations may have on the environment.

Responsibility for establishing and implementing Canglobal's environmental policy rests with the Executive Director, as advised by the General Manager Global Quality, Health, Safety and Environmental, who ensures a management system complying with the requirements of ISO14001 is developed, documented, implemented and maintained as part of Canglobal's Integrated Management System.

**All employees** have a duty to act in accordance with this policy and within the interests of the environment in general.
